

**Amendments to the Specification:**

Please replace the "Abstract" with the following rewritten paragraph:

The product is taken from the group consisting of a foam, an emulsion, a foamed emulsion, a dispersed emulsion and a formed dispersion, where the interface water-air, water-oil or water-solid comprises a complex formed instantaneously by the mixture of at least a protein (or peptide) and a least a polysaccharide oppositely charged or the mixture of two proteins oppositely charged. The product is in a pH range within which the electrostatic interaction between both compounds oppositely charged occurs. The total amount of protein and polysaccharide is between 0.01 and 5% by weight.
